

# The Memecoin of Peace

## 1. Abstract

The cryptocurrency space, and particularly when dealing with decentralization, is typically characterized by high volatility, emotional trading, Fear, Uncertainty, and Doubt, alongside widespread misinformation. \$AiDove is positioning itself as a token on the Binance Smart Chain dedicated to combating this chaos. It bridges the phenomenon of memecoins with practical utility focused on mental and financial clarity. Created by Priest Yonah, \$AiDove aims to foster emotional stability, community, and peace of mind through its core utility: the AiDove Chatbot, an educational and emotional support platform designed to provide calm, fact-based guidance in real time.

## 2. Introduction and Vision

### 2.1 Project Overview

\$AiDove Coin is a community-driven digital asset on the Binance Smart Chain. It is introduced as a symbol of peace for the crypto community, paying homage to the higher idea of clarity and calm. It embraces the viral nature of meme culture while delivering a tangible tool to mitigate the negative emotional consequences often associated with volatile crypto markets.

### 2.2 Core Purpose

To promote peace and emotional stability within the chaotic crypto environment by providing accessible, reliable, and unbiased educational resources and information.

## 3. The Problem and the Solution

### 3.1 The Problem

Crypto markets are subject to rapid volatility and emotional narratives. This environment leads to:

- FUD and FOMO: Emotional trading driven by fear or greed, resulting in making poor financial decisions.
- Information Overload: Difficulty in distinguishing reliable facts from noise, hype, and misinformation.
- Conflict: Elevated levels of dispute and conflict within community channels due to high stakes and lack of clarity.

### 3.2 The AiDove Solution

The AiDove Chatbot is the utility centerpiece of the \$AiDove ecosystem. It is an intelligent, conversational AI designed specifically to address the emotional and educational needs of crypto participants, acting as an impartial source of truth and de-escalation.

## 4. Utility Deep Dive: The AiDove Chatbot

The AiDove Chatbot operates as a conversational AI platform, offering immediate and peace-driven guidance tailored to user needs.

### 4.1 Key Features of the Chatbot

| Feature                  | Description  | Value Proposition   |
|--------------------------|--|---|
| Conversational AI        | A chat bot designed to answer questions about crypto, markets, and community trends.                                   | Provides accessible, natural-language support for complex topics.                 |
| Market Clarity on Demand | Instant, easy-to-understand explanations of token movements, news, and complex market events.                          | Reduces confusion and fear by translating market jargon into actionable insights. |
| Conflict De-escalation   | Built-in emotional guidance mechanisms to mediate disputes and reduce emotional hype or fear in community discussions. | Fosters a healthier, calmer community environment.                                |
| Fact-Based Answers       | Delivers reliable, unbiased responses that cuts through misinformation and market noise.                               | Increases trust and confidence in the information consumed.                       |
| Educational Guidance     | Teaches users how to identify scams, understand market cycles, and build confidence in their financial decisions.      | Empowers users with long-term financial literacy and resilience.                  |

# 5. Tokenomics and Technical Specifications

## 5.1 Token Details

\$AiDove is a token deployed on the Binance Smart Chain aiming to foster peace in crypto.

- **Token Name:** AiDove Coin
- **Ticker Symbol:** \$AiDove
- **Network:** Binance Smart Chain (BSC)
- **Contract Address:**  
0xe9E3CDB871D315fEE80aF4c9FcD4886782694856
- **Total Supply:** 100,000,000,000

## 5.2 Transaction Tax and Distribution

To ensure the longevity and continuous development of the AiDove ecosystem, a small transaction tax is applied to all buy transactions. This small fee is essential for sustaining the platform and rewarding community participation.

- **Transaction Tax:** 1% minimal tax on all buy transactions.
- **Slippage:** Due to the minimal 1% tax, standard slippage settings are generally sufficient for smooth trading.
- **Tax Allocation:** The tax is directed toward operational expenses, future development of the AiDove Chatbot, and supporting the long-term progress of the project.

## 5.3 Initial Token Supply Distribution

The total supply of 100 billion AiDove tokens is allocated transparently across key areas designed to ensure stability, utility, and long-term community growth.

| Allocation Area  | Percentage | Token Amount   | Purpose   |
|------------------|------------|----------------|---|
| Staking Rewards  | 25%        | 25,000,000,000 | Incentivizing long-term holding.                                  |
| Treasury/Reserve | 20%        | 20,000,000,000 | Providing long-term funds for unexpected costs, audits, strategic |

|                            |      |                 |  |
|----------------------------|------|-----------------|--|
|                            |      |                 | investments and listings.  |
| Ecosystem Development      | 15%  | 15,000,000,000  | Funding the continuous feature expansion and maintenance of the AiDove Chatbot.                        |
| Liquidity Pool (LP)        | 10%  | 10,000,000,000  | Ensuring initial market depth for stable trading.  |
| Team and Advisors          | 10%  | 10,000,000,000  | Reserved for core team members, subject to a multi-year vesting schedule to align long-term interests. |
| Marketing and Partnerships | 10%  | 10,000,000,000  | Community outreach and strategic collaborations.   |
| Community Airdrops         | 10%  | 10,000,000,000  | Rewarding early supporters and expanding the user base through initial distribution events.            |
| TOTAL                      | 100% | 100,000,000,000 |  |

# 5.4 Launch and Security

This is a breakdown of the launch method and security measures.

Launch Method: Stealth launch with No presale.

- Liquidity: The project's liquidity tokens are burnt. This critical step permanently removes the ability for the team to withdraw liquidity.
- Contract Security: Contract ownership is renounced. This makes the smart contract immutable and prevents any future changes to the tokenomics, taxes, or total supply.

The burning of LP tokens and renouncing of ownership ensure that the contract is immutable and liquidity cannot be removed, providing maximum security for the community.

# 6. Project Roadmap

The \$AiDove journey is planned across three distinct phases, symbolizing the maturation of the project from inception to widespread global recognition.

| Phase   | Title | Key Objectives (Based on Provided Data)  |
|---------|-------|--|
| Phase 1 | Hatch | Launch on Binance Smart Chain, Stealth launch, LP burn, Ownership renouncement, Initial community building, and development of a minimal viable version of the AiDove Chatbot.                             |
| Phase 2 | Flock | Expansion of the community, major partnerships, integration and feature expansion of the AiDove Chatbot, application for major analytics sites and exchange listings.                                      |
| Phase 3 | Fly   | Global recognition, significant user base utilizing the AiDove Chatbot, exploring further utility development and expansion, establishment of AiDove as the premier token for crypto emotional well-being. |

## 7. Disclaimer and Conclusion

\$AiDove Coin has no association with any government, religious organization, or peacekeeping institution. This token is purely a decentralized meme-based asset that seeks to bring a positive, educational, and calm influence to the often-tumultuous cryptocurrency sector. The community is encouraged to embrace the token as "a meme, a message, and a mirror." Let the Dove fly and bring peace.
